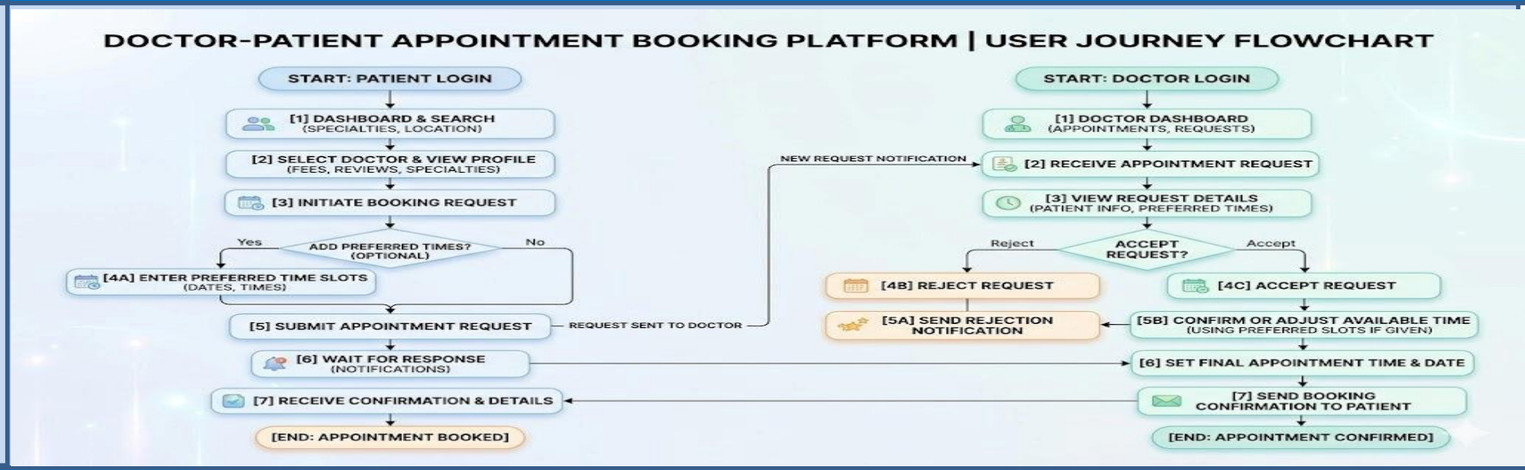
DOCTALK: Smart Doctor Appointment & Feedback Platform

OBJECTIVE

- DocTalk is a user-friendly platform that helps patients easily book doctor appointments based on reviews and personal preferences, ensuring a smooth and transparent experience.
- Doctors can log in to manage schedules, set consultation fees, and receive feedback, making the system efficient and beneficial for both patients and healthcare providers

MODEL / PROJECT DIAGRAM/ GUI / FLOWCHART ETC.



DETAILS OF INNOVATION

- DocTalk is a simple platform where patients can easily find and book appointments with doctors based on reviews, fees, and specialties.
- Patients can check available time slots and even suggest their preferred timings while booking an appointment.
- Doctors can log in to manage their schedules, set consultation fees, and handle appointment requests efficiently.
- The platform allows doctors to accept or adjust requests and receive feedback, making the system transparent and user-friendly for both sides.

OUTCOME & FUTURE SCOPE

OUTCOMES:

- DocTalk offers an easy and efficient way for patients to find specialized doctors, check profiles and reviews, and book appointments by selecting suitable time slots, saving time and effort.
- Doctors can manage appointment requests, accept or reject bookings, and organize schedules effectively, improving communication and making the overall healthcare process more accessible and user-friendly.

FUTURE SCOPE:

- DocTalk can be expanded with advanced features like telemedicine for online consultations, AI-based doctor recommendations, and tools such as digital prescriptions and health record management to improve user experience.
- With added payment integration and scalability, the platform can reach a global audience, making healthcare more accessible, efficient, and technology-driven.
